### Relevant Experience

- 02/2020 - 05/2020 **Assistant (Peer Mentor)**  
Georgian College  
Barrie, ON
  - Provided Peer Mentoring and Peer tutoring to students in the Computers Studies Program which helps them to understand and perform better in their academics.
  - Used HTML, CSS, JavaScript, React, and Firebase knowledge to help and teach students how to use designing and development skills to build optimized websites.
  - Supported incoming students preparing for move-in and campus life to boost their confidence and lessen their hesitation to start college life.
  - Maintained positive working relationship which helps in increase the productivity.
- 07/2017 - 01/2019 **Web Development Freelancer**  
Self employed  
Patiala, India
  - Built website content and designs using HTML, CSS and used JavaScript, JAVA and python for coding which increases my knowledge and make me more efficient.
  - Attended client and project meetings to identify and document user requirements which helps me to fulfill clients' needs.
  - Modified web applications to improve functionality and user experiences which increases web traffic by 10% within a month after that.
- 01/2016 - 06/2016 **Software Developer Intern**  
NIIT, India
  - Generated efficient, modular, and maintainable code on both front-end and back-end using HTML, CSS, JAVA and MYSQL which gives 100% understandable codes to upcoming teams
  - Worked closely with development team members to identify and remove software bugs helps in increase the website performance by 20%.
  - Shadowed team engineers to learn and to gain professional hand on experience.
  - **Achievement:** Received Intern and Project Certification.

### Education and Training

08/2020 Barrie, ON	<b>Big Data Analytics (Got Recognition in Dean's List))</b> Georgian College
12/2019 Barrie, ON	<b>Mobile Application Development</b> Georgian College
07/2016 Punjab, India	<b>Bachelor of Technology</b> in Computer Science & Engineering (Btech) Punjabi University

## Projects

### Medical Web Application (capstone project)

A desktop app that can be used by caregivers to give patient-centric care. The idea is given by a medical start-up. It was a part of my course in college as Major Project.

#### **Roles and Responsibilities:** ·

- Used MongoDB to create a database and created RESTful API to communicate with the database and used Postman to make API calls.
- Resolved technical problems by identifying and fixing bugs collectively as a team which enhanced my knowledge and increased my confidence working in a team and problem-solving techniques.
- Also handled the project as a **Team Lead** with responsibilities of timely communication with clients and arrange quick and urgent meetings whenever the client needed. Also, submit weekly reports to the college Project Coordinator which helps a lot in overall growth in technical and soft skills.

**Tools and Technologies used:** Visual Studio Code, Python (Django), GitHub, HTML, Bootstrap

### Car Renting App (capstone project)

This was a mobile application to rent and buy cars online. Users can sign up and use all the features available. Renters can look up cars based on the distance which uses Google Maps and can contact owners for renting.

#### **Roles and Responsibilities:** ·

- Implemented in **Swift** using an MVC design pattern to build an app for the iOS platform.
- Created responsive design using best UI design practices and used Adobe Xd to create design frames and sketches.
- Connectivity to Firebase database and perform CRUD operations to ensure users' logins and authentication tokens are working fine to maintain the security of the app users.

**Tools and Technologies used:** XCode, Swift, Firebase, GitHub, Google API

## Additional Experience

09/2022 - current Nordia, Toronto, ON	<b>Bell Sales Representative (Work from Home)</b>
05/2022 – 08/2022 Quantum Lifecycle, Brampton, ON	<b>Level 2 Technician</b>
06/2021 - 05/2022 MobileKlinik, Mississauga, ON	<b>Mobile Phone Technician</b>
